SUMMARY

Software Engineer with 4+ years of experience building scalable and high-performance systems for enterprise applications. Proven expertise in backend engineering, observability, system optimization, and API-driven services for modern web platforms. Experienced in improving system reliability through distributed tracing, centralized monitoring, and performance tuning. Strong focus on clean architecture, maintainable code, and secure multi-tenant systems that support real business operations. Passionate about delivering reliable, efficient, and scalable solutions in fast-paced development environments.

EXPERIENCE

Software Engineer

02/2024 - Present

PT Infokes Indonesia ↗

- Designed and maintained scalable API-driven services for modern enterprise applications and external system integrations.
- Reduced application latency from ~1.2s to 500ms (~58% improvement) through query optimization and system tuning, significantly improving system responsiveness.
- Improved system reliability by reducing overall error rate from 3.5% to 1.2% and critical errors from 0.8% to 0.2% across production environments.
- Implemented end-to-end observability, centralized logging, and distributed tracing to accelerate debugging and incident resolution.
- Designed complex ETL pipelines and automated workflows for large-scale data processing across multiple integrated systems.
- Applied clean architecture principles and maintainable coding practices to build scalable, secure, and long-term sustainable systems.
- Collaborated through code reviews, Git workflows, CI/CD pipelines, and Trunk-Based Development (TBD) practices to ensure high engineering standards and reliable delivery.
- Enhanced interoperability by integrating multiple third-party and enterprise services while maintaining security and operational stability.

Software Engineer

11/2023 - 09/2025

PT Teknologi bangsa Cerdas ↗

- Accelerated transaction processing by integrating BCA and Nobu QRIS payment systems, enabling seamless digital payments for online store customers.
- Enhanced logistics efficiency through J&T and JNE API integration, automating shipment tracking and reducing manual order processing time.
- Applied Test-Driven Development (TDD) architecture to ensure robust and reliable code quality.
- Actively exploring emerging technologies and architectural patterns in my spare time, which allows me to stay current with industry trends and continuously improve my skill set.

Software Engineer (Freelance)

03/2020 - 10/2023

ASIA PACIFIC URBAN DESIGNER ↗

- Modernized digital presence by redesigning the company website, resulting in improved user engagement and professional brand image.
- Streamlined content management by building a comprehensive CMS for members and admins, reducing content update time by 70%.
- Enabled scalable event management through dynamic registration forms, supporting multiple events with zero downtime.
- Designed and integrated event-driven architectures to enhance system scalability, decoupling, and real-time data processing.

Software Engineer (Internship)

07/2022 - 12/2022

PT PADEPOKAN TUJUH SEMBILAN ↗

- Enhanced system reliability by maintaining and optimizing the leave management system, reducing bug reports by 60%.
- Improved user satisfaction through implementation of new features based on user feedback and system analysis.
- Ensured quality deployment by designing and executing comprehensive user acceptance testing protocols, achieving 95%+ test pass rate.
- Delivered actionable insights through technical expertise, providing improvement recommendations that enhanced system performance.

EDUCATION

Computer Science

09/2019 - 09/2023

INDONESIA COMPUTER UNIVERSITY - Bachelor of Science

CERTIFICATES

LKS IT Network System Administrator

04/2019 - Present

ITNSA

Became a contestant in the LKSN field of IT Network System Administrator and won 1st place

SKILLS

Node JS	Advanced	Redis	Advanced
Express JS	Advanced	Docker	Advanced
Go	Intermediate	PostgreSQL	Intermediate
Vue	Advanced	Typescript	Intermediate
PHP	Advanced	Airflow ETL	Intermediate
Laravel	Advanced	MySQL	Advanced
Microservices	Expert	React	Intermediate
Problem Solving	Advanced	Elysia JS	Intermediate
Analytical Skill	Advanced	BUN	Intermediate
Interpersonal Skill	Advanced	Javascript	Advanced
Clean code practices	Advanced	Codeignier	Advanced
SOLID Principles	Advanced	Git	Advanced

LANGUAGES

English Intermediate
